

geometry, review of, 842, 842*t*
Germer, Lester H., 773, 923
glaucoma, 545
global warming, 332–333
gluons, 812, 812*t*, 815, 815*f*
graphs: of data, 21, 22*f*; for finding resultant vector, 83–84, 83*f*, 84*f*; position-time, 45–46, 45*f*, 46*f*; for solving simultaneous equations, 840; velocity-time, 50, 50*f*, 52, 52*f*
gravitational field, 121, 245–247, 246*f*, 921, 921*f*
gravitational force, 120–121, 240–242 (*see also free fall; weight*); acceleration due to, 60, 135, 246; action-reaction pairs of, 134, 241; apparent weightlessness and, 252–253, 252*f*; black holes and, 243; center of gravity and, 904; curved space-time and, 921, 921*f*; electric force compared to, 570; as field force, 121, 245–247, 246*f*, 921, 921*f*; on floating object, 277, 277*f*; as fundamental interaction, 143, 811, 812, 812*t*; Newton's universal law of, 241–242, 241*f*; normal force and, 135–136, 136*f*, 252, 252*f*, 253; ocean tides and, 244, 244*f*; orbital motion and, 240, 240*f*; standard model and, 815, 815*f*, 816, 816*f*; universal constant of, 241, 245, 245*f*; weight and, 120–121, 135, 135*f*, 246, 252
gravitational mass, 247, 920, 921
gravitational potential energy, 169–170, 170*f*, 171; conservation of mechanical energy and, 174–177, 174*f*, 175*t*; electrical potential energy compared to, 595; of fluids, 911; gravitational field and, 245; as mechanical energy, 173–174, 174*f*; of pendulum, 374, 374*f*; zero level of, 170
gravitons, 812, 812*t*, 815*f*
ground state, 766, 776–777, 776*f*, 777*f*, 926

H

hadrons, 812–815, 813*f*, 813*t*, 814*f*, 814*t*
half-life, 803–806, 806*f*, 811, 826–827, 874–879
hard magnetic materials, 679
harmonic series, 422–429, 423*t*, 424*f*, 425*f*, 427*f*, 428*t*

hearing loss, 416, 421
heat (*see also latent heat*): compared to temperature, 306–307, 307*f*; conduction of, 308, 308*f*; electrical energy converted to, 620–621, 622; as energy transfer, 305–309, 305*f*, 306*f*, 307*f*, 308*f*; first law of thermodynamics and, 342–345, 342*f*, 343*t*, 344*t*; friction and, 260, 309, 336, 342; sign of, 343, 343*t*; thermodynamic processes and, 339, 339*f*, 341, 341*f*, 344*t*; unit of, 307, 307*t*; work and, 309–310, 336–337, 336*f*
heat engines, 346, 347–348, 347*f*; efficiency of, 352–354, 353*t*; entropy and, 356, 356*f*
heat of fusion. *See latent heat*
heat of vaporization. *See latent heat*
height (*see also displacement*), gravitational potential energy and, 169–170, 170*f*
Heisenberg, Werner, 775
helium (*see also alpha* [α] *particles*), in fusion reactions, 809, 810, 919*f*
hertz (Hz), 376
Hertz, Heinrich, 732, 756
Higgs boson, 817
high school physics teacher, 221
Hooke, Robert, 369
Hooke's law, 368–371, 368*f*, 379, 380
horizon, of black hole, 243
horizontal velocity, 96, 96*f*, 97–99, 98*f*, 99*f*, 116–117, 117*f*
Hubble Space Telescope, 540, 913, 913*f*
human body: atmospheric pressure and, 910; electric current and, 608, 615, 722; temperature and, 312, 731*f*
Huygens, Christian, 449
Huygens' principle, 449, 449*f*, 532–533, 533*f*
HVAC technician, 320
hybrid electric vehicles, 636–637
hydraulic lift, 281, 281*f*
hydrogen: Bohr model of, 765–770, 766*f*, 767*f*; in early universe, 816; fusion of, 809, 810, 919*f*; isotopes of, 791; wave function for, 776–777, 776*f*, 777*f*
hydrogen bomb, 809
hydroplaning, 142
hypotenuse, 87, 843, 844
hypothesis, 6, 8–9, 8*f*, 10

I^2R loss, 620, 623, 729
ice: melting of, 317, 317*f*, 317*t*; volume of, 300
ice point, 301, 302, 302*t*
ideal fluid, 284, 909
ideal gas, 302, 302*f*, 908–909, 908*f*
ignition coil, 730, 730*f*
illuminance, 450
image (*see also real image; virtual image*): in concave spherical mirrors, 455–456, 455*f*, 456*f*, 459, 460*t*; in convex spherical mirrors, 463, 463*f*; in flat mirrors, 453, 453*f*; with lenses, 496, 497*t*, 498, 498*f*, 499, 499*t*, 503, 503*f*, 505, 505*f*
impulse, 200, 207, 210, 210*f*
impulse-momentum theorem, 200–204, 202*f*, 203*f*, 204*f*, 209
incandescent light sources, 541 (*see also light bulbs*)
inclined plane, 258, 259*f*
incoherent light sources, 527, 541, 541*f*, 542
incompressible fluid, 275, 284, 909
index of refraction, 490, 490*t*, 491, 492; of atmosphere, 509; total internal reflection and, 506–507; wavelength dependence of, 492, 509–510, 509*f*, 510*f*, 511, 511*f*
inductance, mutual, 721, 721*f* (*see also electromagnetic induction*)
induction of charge, 562, 562*f*, 590
inelastic collisions, 212–217, 212*f*, 213*f*, 220*t*
inertia, 125–126, 125*f*, 128; circular motion and, 239–240; moment of, 905–907, 905*t*, 907*f*, 907*t*
inertial mass, 247, 920, 921
infrared waves, 447*t*, 731*f*, 733*f*, 735*f*, 736, 752
infrasonic waves, 409
instantaneous velocity, 46, 46*f*, 46*t*
insulators, electrical, 561, 563, 563*f*
insulators, thermal, 308
integrated circuits, 646
intensity: of light, 450, 450*f*, 484–485, 542; of sound, 414–417, 414*f*, 416*f*, 417*t*, 418; unit of, 414
interference, 389–391, 389*f*, 526–527, 526*f*, 527*f* (*see also constructive interference; destructive interference; standing*
